

A scatter plot showing the distribution of 'Fake' (blue dots) and 'Genuine' (orange dots) data points. The plot is enclosed in a black rectangular frame. A legend in the top-left corner identifies the colors: a blue dot for 'Fake' and an orange dot for 'Genuine'. The 'Genuine' data points form a large, dense, roughly circular cluster in the upper half of the plot. The 'Fake' data points form a smaller, more compact cluster in the lower half, directly beneath the 'Genuine' cluster. There is a small region of overlap between the two clusters in the center. Several 'Genuine' points are scattered outside the main cluster, particularly towards the right and top edges.
