

A scatter plot showing the distribution of 'Fake' (blue dots) and 'Genuine' (orange dots) data points. The plot is enclosed in a black rectangular frame. A legend in the top-left corner identifies the colors: a blue dot for 'Fake' and an orange dot for 'Genuine'. The 'Genuine' data points form a large, dense, roughly circular cluster in the upper half of the plot. The 'Fake' data points form a smaller, more elongated cluster in the lower half, positioned directly beneath the 'Genuine' cluster. There is a small region of overlap between the two clusters in the center. Several 'Genuine' points are scattered outside the main cluster, particularly towards the right and top edges of the plot area.
