

A scatter plot showing the distribution of 'Fake' (blue dots) and 'Genuine' (orange dots) data points. The x-axis ranges from -4 to 4, and the y-axis ranges from -4 to 4. The 'Genuine' points are more numerous and form a dense, roughly circular cluster centered around (0,0). The 'Fake' points are more sparsely distributed, often appearing as outliers further from the center, particularly along the axes.
