

A scatter plot showing the distribution of 'Fake' (blue dots) and 'Genuine' (orange dots) data points. The 'Genuine' points form a large, dense cluster in the lower half of the plot, while the 'Fake' points form a smaller, denser cluster in the upper half. There is a significant overlap between the two clusters in the middle region. A legend in the top right corner identifies the colors: blue for 'Fake' and orange for 'Genuine'.
